### Product Description

In 1.3mm thickness, Formica ColorCore features the high performance characteristics of Formica decorative laminate while eliminating the dark line sometimes associated with laminate edges. ColorCore in Matt finish increases levels of wearability and reduces the visual impact of chips and scratches. For something extra special, use of decorative effects created by engraving and sandblasting can create truly unique surfaces.

### Design Guidelines

With stain resistance and increased wearability, ColorCore is ideal for applications such as countertops, point of sale units, doors and work surfaces.

### Environmental

Laminex New Zealand has established GREENfirst® to encompass numerous programmes of environmental management. This reflects our belief that action must follow good intentions and ambitious goals. We are taking action to: reduce energy use throughout the life of our products through finding and implementing economical energy-efficient solutions for our businesses; ensure active water stewardship; reduce carbon emissions by optimising energy usage in the production of our products; work with suppliers to increase recycled and eco-friendly content in our raw materials, making mandatory the use of fibres from sustainable forests; ensure that our products and services meet or exceed requirements of ISO14001 Eliminate or minimise waste from products, services and workplaces. Participation in clusters which provide education and advocacy in sustainability including New Zealand Green Building Council; Sustainable Business Network and EnviroSpec.
