Product Class

CLASS 1

Product Description

Eliteline is a versatile interior panel designed to bring a timeless aesthetic to any space. Featuring precision V-grooves at 100mm centers, it replicates the traditional look of tongue-and-groove timber, offering a classic yet contemporary feel. Crafted from high-quality materials, Eliteline combines durability with a refined finish, making it suitable for various interior applications, including walls, ceilings, and decorative features. Its smooth surface is ready for painting or staining, allowing for customization to suit any design vision. With its easy installation and low-maintenance requirements, Eliteline is the ideal choice for achieving a sophisticated, seamless interior look that balances practicality with style.

Scope of use

- Interior wall paneling
- Ceiling paneling
- Feature walls
- Residential interiors
- Commercial interiors
- Retail fit-outs
- Hospitality spaces
- Educational facilities
- Office spaces
- Hallway and corridor accents

New Zealand Building Code (NZBC)

The product will, if employed in accordance with the supplier's installation and maintenance requirements, assist with meeting the following provisions of the building code:

- **Clause B2 Durability:** Performance B2.3.1(c) Compliance Pathways. B2/AS1 Table 1.

Evidence

The product meets the requirements set out in the following documents, or relevant parts of cited standards within the documents:

This product complies with the requirements of Clause B2.3.1(c) of the Building Code, demonstrating durability for a period of 5 years under normal maintenance conditions. Building elements covered by this clause, including linings, renewable protective coatings, are designed for easy access and replacement, ensuring minimal disruption. Any potential failure would be easily identifiable during normal use of the building, enabling timely maintenance or replacement. A warranty supporting this durability claim is available upon request.

Supporting Evidence

The product has and can make available the following additional evidence to support the above statements:

Suitable for interior use only and are not recommended in exposed, damp or wet conditions. Panels may warp or expand if not sealed.

Installation requirements

Panels must be installed by qualified tradesmen and handled with care. Prior to installation, the product must be stored inside, off the ground, in a dry, well-ventilated area away from extreme temperature fluctuations. It is important to protect the panels during storage by covering and protecting all parts that can be exposed to damage, light or moisture however, panels must not be left wrapped in a non-breathable material (i.e. plastic) for longer than 4 days. The panels must be stacked squarely on top of one another with a full cover sheet on top to avoid edge discolouration. Panels should not be exposed to natural light when being stored as wood is a natural material and changes over time when exposed to UV-light.

Maintenance requirements

We recommend cleaning the panels when required with a warm damp cloth. Do not use any solvents or abrasive cleaners. Clean off any dust that accumulates immediately.

Warrantees

5 Year Warranty - Subject to the terms of this Warranty, Big River Group (NZ) Ltd – ('Plytech Panels') warrants that, for the Warranty Period (as set out in Schedule 1) will be free from defects as a direct result of manufacture.
