Level of assurance needed to demonstrate NZ Building Code Compliance

LOW

Supporting documentation should include self-assessment and technical information by manufacturer

Laminex confirms that this minimum level of assurance has been met or exceeded by the following:
Laminex NZ
Warranty - 7 years

Product Description

Laminex Innovations is a specialised range of vertical use laminates featuring metallic and abstract designs designed for applications such as shop fittings, boutique accommodation, residential environments and office interiors.

Design Guidelines

Laminex Innovations Metallics are ideal for walls, doors, feature panelling, room dividers, exhibition stands & shopfitting (displays, stands etc). Other uses include fireplace & kitchen hoods, lift linings & many other areas where a metallic look is desired.

Metallic finishes are recommended for light duty interior applications only. They are not recommended for heavy usage areas such as worktops, bars, tables, kitchen splashbacks or kick boards. Laminex Innovations Metallics are not heat formable & are not recommended for areas of high humidity such as bathrooms or laundries as exposure to moisture for prolonged periods can cause corrosion of the metallic surface and/or delamination.

Laminex Innovations Brushed Stainless steel is a high-pressure laminate resistant to solvents, chemicals and household reagants & has an extremely hard wearing surface. It is suitable for both vertical & horizontal applications such as feature panelling, benches, table tops, bar tops, and doors.

Environmental

Laminex New Zealand has established GREENfirst® to encompass numerous programmes of environmental management. This reflects our belief that action must follow good intentions and ambitious goals. We are taking action to:

- reduce energy use throughout the life of our products through finding and implementing economical energy-efficient solutions for our businesses;
- ensure active water stewardship;
- reduce carbon emissions by optimising energy usage in the production of our products;
- work with suppliers to increase recycled and eco-friendly content in our raw materials, making mandatory the use of fibres from sustainable forests;
- ensure that our products and services meet or exceed requirements of ISO14001 Eliminate or minimise waste from products, services and workplaces.
- Participation in clusters which provide education and advocacy in sustainability including New Zealand Green Building Council; Sustainable Business Network and EnviroSpec.
